Since the last great plague in London	12
Since his maiesties Coronation in Scotland 29 Jul.	8
Since his happy comming to London 7 May	xii

A necessary rule to know the beginning and ending of euery Tearme, with their Returnes.

¶ Hillarie Terme beginneth the 23. daie of January, and endeth the 12. of Febzuary, & hath foure returnes.

Octabis Hillarij. } { Crastino Purifica.
Quind. Hillarij. } { Octabis Purifica.

¶ Easter Terme beginneth 17. daies after Easter, and endeth the Munday next after Ascention day. And hath fiue Returnes, that is to say.

Quind. paschæ. } Mense paschæ. { Quinque paschæ.
Tres paschæ. } { Crasti Ascention.

¶ Trinitie Terme beginneth the Friday next after Trinity Sunday, and endeth the Wednesday fortnight after. And hath foure Returnes, that is to say.

Crasti Trinitatis. } { Quind. trinitatis.
Octabis Trinitatis. } { Tres trinitatis.

¶ Michaelmas Terme beginneth the 9. day of October, and endeth the 28. of Nouember. And hath 8. Returnes, that is to say.

{ Octabis Michael. } { Crast. Animarum. }
{ Quind. Michael. } { Crast. Martinij. }
{ Tres Michael. } { Octabis Martinij. }
{ Mense Michael. } { Quind. Martinij. }

¶ Note also that the Exchequer openeth eight daies before any Tearme beginne, except Trinity Tearme, it. which it openeth foure daies before.

¶ On these dayes following, the Iudges sit not at Westminster.

In { Hillary / Easter / Trinity / Michaelmas. } Terme, on { Candlemas / Ascension / Midsomer. / Allhollond } day

The Anathomy of mans body, as the parts thereof are gouerned by the 12. signes of the Zodiaque.

Aries the head and face.

Taurus Necke & throat

Cancer Breast stomak & ribs.

Virgo bewels & belly.

Scorpio Secret members.

Capricornus knees

Gemin Armes & shoulders.

Leo Heart & backe.

Libra Reines & loines

Sagitarius Thigh

Aquar. The legges.

Friend. 1615.

A Prognostication, seruing for this present yeare of our Lord God. 1615.

Being the third from the Leape yeare.

Containing the estate of the whole yeare, the disposition of each Quarter, and the Inclination of the weather for euery Quarter of the Moone throughout the whole yeare.

Also, the rysing and setting of the Planets, Husbandly Aduertisements, with other conuenient Notes for Bleeding, Bathing, Purging, Sweating; and other matters of good consequence.

By GABRIELL FRIEND.

Sapiens Dominabitur Astris.

Imprinted at London for the *Companie of Stationers.*

A Declaration of the Disposition of the foure Partes or Quarters of this present yeare. 1615.

And first of Winter

The ☉ Sunne in ♑ Capricorne, ♒ Aquarius, ♓ Pisces.

In stead of Flowers, and Grasse so greene,
the Earth hath got an other hew:
Frostes, Snow, and durtie Dales, are seene,
where pleasant Plants, most fruitfull grew:
Childhood, cold Rhewme, and Phlegmaticke state,
of Winters nature doth best relate.

This Quarter, according to our English vsuall account, began in the yeare last past 1614. on the 1. day of December; at which time, the Sunne entred into the first degree of the signe Capricorne, being in his greatest distance, and farthest remooued from our Verticall point, making to vs the shortest day, and longest nights in the yeare. This Quarter continueth vntill the 1. day of March next ensuing which is in the yeare of our redemption 1615. then the Winter Quarter shall cease, and the Spring Quarter take place.

The proper qualities of this Quarter according vnto natures Inclination, (is cold and moyst) cleane opposite and contrary to the qualitie of Sommer Quarter: for those thinges which Sommer bringeth forth and nourisheth, and like the lustie Bee, prouideth. Winter, with his cold continuance like the idle Drone, destroyeth and deuoureth. Now the sapp & iuyce leaueth the branches of Trees and Hearbs, and descendeth into the Roote: and naturall heate is now driuen to the Inward partes of mans body; whereupon the Rootes of Plants and Hearbes, are most necessary in Winter, for Physicall vses.

The ordinarie griefes attending vpon this cold Quarter, are shortnesse of Wind, the Stone, head Aches, Joynt aches, Stiches in the side, Rewmes, Coughes, hoarsenesse in the Throate, Colicke, Strangury and Phlegmaticke Feuers.

Wherefore for to preuent such griefes,
vse meates that warme and dry.
Both head and feete see warme thou keepe,
eate well, drinke but sparingly.

Of the second part of the yeare, called, the Spring.

The ☉ Sunne in ♈ Aries, ♉ Taurus, ♊ Gemini.

Most welcome is the fruitfull Spring,
To Creatures all that multiply:
Both Birdes and Beastes doe skip and sing,
In flocking sort abundantly:
In Sanguine men and youthfull yeares,
This seasons nature best appeares.

THe Sunne hauing made his progresse, and finished his course through the three Hiemall or Winter signes, at his approach and entrance into the beginning & first degree of Aries, he bringeth on, and beginneth the Spring quarter: which falleth out this yeare on the 1. day of March, and endeth on the 21. day of June.

The naturall disposition of this Quarter, is hotte and moyst, resembling the Ayre, and youth of man. Now is the day and night of an equall length, for the Sunne riseth at vi. a clocke in the morning, and setteth at vi. in the euening; so equalling the artificiall day.

This Quarter is very temperate and holsome: and therefore Hipocrates, and other excellent Phisitians, hold it to be the chiefest time in all the yeare for to take Phisicke, and to giue ease to such as be diseased: and not onely to such that feare Diseases to breed in them, but also for such that haue had long lingring Diseases.

The

The Diseases incident to this Quarter, are Faintinges, fluxes of Bloode, Plurisies, Giddinesse of the Head, Kinges euill, Swellinges in the Throat, Rheumes, Melancholie, Leprosie, Head-ach, Scabbes, Madnesse, Apostumes, sore Eyes, and the such like.

Fresh Humors now abound man in,
to Bleed and Purge, spare not thy wealth:
Let Meates be pure, and Meales but thin,
if thou regard thy future health.

Of the Third part of the Yeare, called Sommer.

The ☉ Sunne in ♋ Cancer, ♌ Leo, ♍ Virgo.

Bright SOL hauing got the highest grade,
Lookes downe on Earth with hot aspect:
Parching the Ground, and cornie Blade:
Ripening all thinges with good effect:
Chollericke men, and middle Age,
Of Sommers nature doe presage.

SOmmer is well said to be the nourisher both of man and beast, and all other Creatures, by prouiding & bringing forth those thinges which are needfull for them.

This Quarter beginneth at the Sunns entrance into the first Scruple of Cancer, which is this yeare on the 21. day of June making the longest dayes and shortest nightes in the yeare: and endeth on the 22. of September, at the Sunnes entrance into the first scruple of Libra.

The Condition of this Quarter, will not much alter his accustomed naturall disposition: which is, hotte and dry: of complexion chollericke, resembling fire. Mans Stomacke is now slowest of digestion, because naturall heat leaueth the inward partes, and possesseth the outward, take heed therefore of eating or drinking immoderatly, least that you surfet.

The ordinary Maladies of this season are these, Vomitinges, hotte burning Agues; but especially tertian Agues, Fluxes, Jaundies, Ulcerations of the Mouth, Inflamations of the Eyes, Paine in the Eares, Lasks, Unquietnesse of minde, Pushes in the Face; with other strange Diseases proceeding from corrupt inflamed Blood.

Mans Stomack now more weaker is,
then earst it was before:
Let moysture therefore be thy Meate,
eate lesse, but drinke the more.

Of the fourth part of the yeare, called *Autumne*, Harvest, or the Fall of the Leafe.

The ☉ Sunne in ♎ Libra, ♏ Scorpio, ♐ Sagittarius.

For Good-husbands paine, Harvest yeeldes gaine,
Whatsoeuer now on earth doth grow:
Each Tree, Plant, Shrub; all for mans good:
Shewes them their dutie G d vnto:
Crooked old Age, Humor, Melancholie,
Will Autumns nature truly verifie.

AVtumne or Harvest, commonly called, The fall of the Leafe, according to our English account, beginneth when the Sunne having finished the Sommer quarter in the last degree of Virgo, and at his first ingression into the first degree of Libra, making againe the dayes and nights of an equall length vnto all Nations: which is on the xiii. day of September; and lasteth whiles that the Sunne passeth through these signes Libra, Scorpio, Sagitarie: and so finishing the season at the Sunnes entraunce into the first Scruple of Capricorne, which is on the xi. day of December.

The condition of this season, according to naturall inclination, is (cold and dry, fitly compared to the Earth) and melancholy humor,

of the Northen Region: being the vnholsommest Quauter in the yeare, tearmed by Hypocrates, The Mother and Nurse of all deadly Diseases.

Now the face of the earth looseth her Beautie, Plants & Trees cast their flowers and fruites, Beasts betake them selues to theire Dennes, and Serpents to their Caues: Floods are now at the highest, and Springs at the lowest

The Infirmities incident to this sickly season, be many and dangerous, as Strangurie, quarterne Agues, Sciatica, Botches, Collicke, melancholie passions, Lamenesse, and weaknesse of the Lummes, Falling-sicknesse, shortnesse of winde, Consumptions, swelling, and vlcerations in the Throate and mouth, Pyles, Tinpanies, Swelling & hardnesse of the Spleene, Fistuloacs vnacustomed Feuers, and such like.

Take heed therefore of cold raw Fruites,
whose iuice corruption breede;
This Season serueth fitte againe,
to Purge, to Bath, or Bleede.

The

The rising and setting of the Planets, with the Disposition of the weather for the Quarters of the Moone, in euery Moneth of this present yeare. 1615.

Of Ianuarie.

Saturne is neere the South at Sunne rising.
Iupiter is Southwest at Sunne setting.
Mars riseth when the Sunne setteth.
Venus setteth with the Sunne.
Mercurie is in the West at Sunne setting.

FUll Moone on Thursday the v. day, at vi. of the clocke at night, inclined to fayre weather for the most part.
Last Quarter the xii. day being Thursday, three Quarters of an howre after one a clocke at noone, cold raw winterlike weather.
New Moone the xix. day on Thursday, a quarter after v in the morning, inclined to cold Windes for the most part.
First Quarter the xxvi day, on Thursday, at almost three quarters of an howre after two a clocke at noone, frosty weather.

Februarie.

Saturne ryseth a little before the Sunne.
Iupiter is in the South at Sunne setting.
Mars is Southwest at Sunne rysing.
Venus and Mercury set with the Sunne.

FUll Moone the iii. day on Fryday, halfe an howre after iiii. a clocke in the after noone, fayre for the most part.

Last

Last Quarter on Friday the x. day three quarters of an houre after ix. a clocke at night, inclined to some fall of snow or sleete.
New Moone the xvii. day on Fryday, at a quarter after v. in the euening, inclined to cold rayny weather
First Quarter the xxv day on Saterday, three quarters after xi. a clocke at mid-day, windy and wet weather.

March.

Saturne is in the West a little before the Sunne setteth.
Iupiter walketh towards South at the Sunne setting.
Mars forsaketh the South at Sunne rysing.
Venus and Mercury set a little before the Sunne.

FUll Moone on Sunday the v. day three quarters after vi. in the morning, windy weather.
Last Quarter on Sunday the xii. day, neere iiii. a clocke in the morning, windy and wet weather.
New Moone the xix. day being Sunday, at a quarter after vi. in the morning, variable, with some fall of drops.
First Quarter on Monday the xxvii. day at a quarter after vii. in the morning, troubled ayre, inclyned to hayle or raine.

Aprill.

Saturne is in the West at Sunne setting.
Iupiter walketh toward the South at Sunne setting.
Mars is in the South at Sunne rysing.
Venus and Mercurie are in the East at Sunne rysing.

FUll Moone on Monday the iii. day at vi a clocke at night, temperate weather.
Last Quarter the x. day being Monday, a quarter after x. in the morning, wauering weather.
New Moone on Monday the xvii. day a little after viii. at night, moyst weather for the most part.

First

First Quarter on Tewesday the xxv. day, halfe an hower after xi. at midnight, weather fitting the season.

May.

Saturne is Southwest when the Sunne setteth
Iupiter ryseth when the Sunne setteth
Mars is neere the South at the rysing of the Sunne.
Venus ryseth a little before the Sunne.
Mercurie is in the West at Sunne set.

Full Moone on Wednesday the iii. day halfe an hower after iiii. in the morning, fayre sunshyning.
Last Quarter on Tewesday the ix. day, three quarters after v. at night, temperate, with some fall of raine.
New Moone the xvii. day being Wednesday, neare vi. a clocke in the morning, seasonable weather for the time.
First Quarter the xxv. day, being Thursday, at a quarter after two in the after noone, coole and comfortable.

Iune.

Saturne creepeth towards Southwest at Sunne setting.
Iupiter is Southwest at Sunne rysing.
Mars marcheth towards the South at Sunne rysing.
Venus is Southeast when the Sunne ryseth.
Mercurie is in the West after Sunne set.

Full Moone on Thursday the first day, halfe an hower after vi. in the morning, fayre cleare sunshine weather.
Last Quarter on Thursday the viii day at a quarter after two in the morning, pleasant weather for the time.
New Moone on Fryday the xvi. day, halfe an hower after one in the morning, moysture threatned.
First Quarter the xxiii. day being Saterday, a quarter after two in the morning, windy and wauering.
Full Moone on Friday the last day, halfe an hower after vii. at night, temperat coole weather.

Iuly.

Saturne is neere the South at Sunne setting.
Iupiter forsaketh the South at Sunne rysing.
Mars and Venus are Southeast at Sunne rysing.
Mercurie ryseth a little before the Sunne.

LAst Quarter on Friday the vii. day a quarter after two at noone, hot sunshyning.
New Moone on Saturday the xv. day halfe an hower after iiii. in the after noone, cloudy and stormy weather.
First Quarter on Sonday the xxiii day at almost high noone, darke skie and troubled ayre.
Full Moone on Saturday the xxx. day, an hower after mionight, windy and wett.

Auguſt.

Saturne is Southeast when the Sunne setteth.
Iupiter is Southeast at the Sunne rysing.
Mars and Venus are in the East at Sunne rysing.
Mercury is under the Beames.

LAst Quarter the v. day on Saterday, a litle after vii. at night, cool and comfortable.
New Moone on Monday the xiii. day, at three quarters after vi. in the morning, weather fitting the season.
First Quarter on Monday the xxi day, three quarters after v. in the after noone, fayre sunshining.
Full Moone on Monday the xxvii. day at halfe an hower after x. in the morning, temperate coole weather.

Septem-

September.

Saturne is in the East at Sunne setting.
Iupiter goeth towards the South at Sunne rysing.
Mars is Southeast at Sunne rysing.
Venus leaueth Southest at Sunne rysing.
Mercurie is in the West at Sunne set.

LAst Quarter on Monday the iiii. day at three quarters after x. at night, variable weather.
New Moone on Tewesday the xii. day, neare three quarters after ix. at night, windy and wauering.
First Quarter on Tewesday the xix. day at a quarter after xi. at night, fayre Sun-shyning.
Full Moone on Tewesday the xxvi. day, at a quarter after ix. at night, moysture threatned.

October.

Saturne ryseth when the Sunne setteth.
Iupiter and Mars forsake the East at Sunne rysing.
Venus is Southeast at Sunne rysing.
Mercurie is vnder the Sunne beames.

LAst Quarter on Wednesday the iiii. day, neare vi. a clocke at night, raynie weather for the most part.
New Moone on Thursday the xii. day, halfe an howre after xi. at high noone, wauering weather.
First Quarter on Fryday the xix. day, halfe an howre after x. in the morning, stormy and tempestuous weather.
Full Moone the xxvi. day on Thursday, a quarter after xi. in the forenoone, more temperate weather.

Nouem-

Nouember.

Saturne is in the East at Sunne setting.
Iupiter is in the East at Sunne rysing.
Mars marcheth towards the South at Sunne rysing.
Venus and Mercurie are in the South at the Sun rysing.

LAst Quarter on Fryday the iii. day at two a clocke in the after noone, fayre cleare skie.
New Moone on Fryday the i. day at a quarter after xi. before noone, moysture threatned.
First Quarter on Fryday the xvii. day, a litle after two in the after noone, windy and wet for the most part.
Full Moone on Saterday the xxv. day, three quarters after three in the morning, variable winterlike weather.

December.

Saturne forsaketh the South when the Sunne ryseth.
Iupiter and Venus walke towards the West at Sun setting.
Mars is in the Southwest at Sunne setting.
Mercurie is vnder the Sunne beames.

LAst Quarter on Sunday the iii. day, at ix. a clocke in the morning, wauering weather, inclined to moysture.
New Moone on Sunday the i. day, neare three quarters after i. in the morning, stormy and tempestuous weather.
First Quarter on Sunday the xvii. day, a litle after one a clocke in the morning, fayre sunshyne weather.
Full Moone on Sunday the xxiii. day, at a quarter after i. a clocke at night, winterlike weather.

Short

Short Notes necessarie to be considered in letting of Blood, Purging, Bathing, and Sweating.

IN Letting of Blood, obserue this: Bleed not at all, except vrgent cause compell thee; which is to be knowne by the counsell of the learned Phisition. The Age of the Patient ought also to be regarded: for from very young, or old persons, blood ought not in any case to be taken.

The time of the yeare fittest for this purpose, is from the middest of the Spring, to the beginning of Sommer: Harueſt also is indifferent, the season being temperate.

For Complexion, let Blood the Choller icke when the Moone is in Cancer, Scorpio, or Pisce, in any place, except in the Breast, Members, or Feete.

For the Flegmaticke, the Moone in Aries, or Sagittarius, in any place, except the Head and Thighes.

For the Melancholy, the Moone in Libra, or Aquarius, in any place, the Buttockes and Legges excepted.

And for the Sanguine complexion, let Blood in any of the former Signes, so that it be done with consideration and aduice of the Skilfull.

Take heed further, that yee let not Blood in the extreame heat of Sommer, or cold of Winter; vnlesse the Patient be taken with the Pleurisie, Pestilence, Frensie, Squinancie, or Apoplexie, or the like extreame Diseases; for then you may not stay for a cholen day, least in the meane time, the partie diseased be past helpe.

After Blood letting, abstaine from sleepe and food, for the space of fiue howers: also from all exercise that shall too much straine the Body, for iiii. dayes after, vsing Meates of a light digestion.

Of Purging.

IT is very good to Purge when the Moone is in Cancer, Scorpio, or Pisces: And indifferent vpon extremitie, in Gemini, Libra, or Aquarius.

Purge not when the Moone is in any of these Signes, Aries, Taurus, or Capricorne.

Of Bathing.

THe fittest time in the yeare to enter Bathes, is from the beginning of May, vnto the end of September, when the Moone is in these Signes, Aries, Leo, or Sagittarius, two or three dayes after the change of the Moone, or at the full.

Let the Sunne be of a good height when you enter into the Bath, for then the mystic, and other corrupt Infections, are drawen from the earth.

If you will Bath for cleanlinesse, let the Moone haue her course in Libra, or Pisces.

Bath not when the Moone is in these cold Signes, Taurus, Virgo, and Capricorne.

Of Sweating.

FOr Sweating, let the Moone be in these Signes, Aries, Leo, Sagittarius, Cancer, Scorpio, Pisces. Note further, that it is better to Sweate in the euening, then in the morning.

Husbandly

Husbandrie Aduertisementes needfull to be marked.

When you would Plant or Graffe, consider where the Wind standeth. If it be in the South, it is very good for that purpose: but if it be in the North, or the East, it is not good.

It is good to Plant or Graffe generally, the Moone increasing, in these Signes, Taurus, or Aquarius, in the beginning of the Spring, or the latter end of Harueſt.

Plant Trees for continuance, when the Moone is in Taurus, Leo, or Aquarius.

Cutte Timber to haue it sound, in December or Januarie, in the wane of the Moone, in Aquarius, or Pisces.

Prune Trees, and pull off the Mosse, in the month of Januarie.

Plash Hedges, and Lopp Trees for Fewell, that the Stumpe may the sooner grow againe, when the Moone is in Aries, or Libra; the Moone increasing.

Set young Quicksets, from September to March.

Remoue young Trees in the Last quarter of the Moone, when she is in Aries, Libra, Scorpio, and in these monthes, September, November, or Februarie.

Set Vines in Februarie, March, or September, specially when the Moone is in Aries, Libra, Scorpio; the Moone increasing.

Set Rose-trees in the midst of February, when the Moone increaseth.

Cut or Prune Trees in March or Aprill, the Moone in Taurus, Virgo or Capricorne.

Gather Fruite, as Apples, Peares, and the like, at the Full of the Moone, in the afternoone, the weather being fayre and dry, else they will rotte.

Sow all kind of Corne and Graine, the Moone increasing, in Cancer, Libra, Aquarius.

Reape Corne for the long continuance of it, and the Straw dry, in the wane of the Moone, and in a dry season.

Reape

Reape Wheate in August.

Sow Flax and Hempe, in Februarie.

Pole Hoppes in Februarie

Cut downe Hay presently after the Full of the Moone.

Dunge Ground to preuent the growing of Weedes, the Moone decreasing.

Sow Carret seedes about the end of Februarie, or beginning of March, the Moone increasing.

Sow Cabbages about the last of August, three or foure dayes after a Full Moone: or in Februarie or March, is good also.

Sow Cowcumbers, Pumpions, and Gourdes, in March, Februarie, or June, in a faire cleare dry day.

Sow Colewortes in the beginning of September.

Sow Parsnips in Februarie or Aprill, the weather being temperate.

Sow Lettuce seede in the beginning of September, Februarie or March.

Sow Onions in the beginning of March, the weeke before or after a Full Moone.

Sow Radish seede from the end of March to the beginning of July.

Sow Leekes to serue Sommer, in Aprill, May, or June: and to serue Winter, in September or October.

Sow Spinage, Fennell, Parsely, Annis seed, and Hisope, in Februarie, or March, at the Full of the Moone.

Sow Beets in Februarie or March, when the Moone is at the full.

Sow Time, Rosemarie, Lauender, Violets, and Burrage, in Februarie or March, the Moone increasing.

Sow Strawberries in September.

Sow all manner of sweete Hearbes, and for the Potte, to haue them in Winter, in August, or September: and in Aprill to serue for Sommer the Moone increasing.

Sow Flaxe and Hempe, in the moneth of Februarie.

Pole Hoppes in Februarie: and gather them in September, the weather being dry.

Set Leekes and Garlicke, in Januarie.

A Prognostication.

Set Artichokes in Februarie, March, or Aprill.

Sow Barlie in Februarie.

Set Rosemarie in June.

Set Filbeardes in October.

Gather Hearbes for continuance, in June: but let them be well dryed in the shade first.

Make Malt in the moneth of November.

Set Beanes in Januarie or Februarie, in some shadie place, as under Trees, or the like, the ground being prepared and made cleane.

Geld or Cutt Cattle, the Moone decreasing, in these Signes, Sagittarius, Capricornus, or Pisces, and in the Moneth of June.

Sheare Sheepe that the Wooll may grow the sooner: And cutt Haire, that it may doe the like, when the Moone is in these Signes, Taurus, Libra, or Virgo.

Cutting or shaving in the age of the Moone, causeth baldnesse: what then is cutt or shaved, groweth slowly.

Kill fatte Swine for Bacon the better to continew his fatte in boyling, when the Moone is at the full, but not long after.

A necessarie Table for Expenses.

		Weeke,	Month,	Yeare.
A Farthing	by y day, is	i.d. ob.q.	vii.d.	v.s.viii.d.q.
A halfe penny		iii.d. ob.	xiiii.d.	xv.s.ii.d.ob.
A Penny		vii.d.	ii.s.iiii.d.	xxx.s.v.d.
ii. Pence		xiiii.d.	iiii.s.viii.d.	iii.li. x.d.
iii. Pence		xxi.d.	vii.s.	iiii.li.xi.s.iii.d
iiii. Pence		ii.s.iiii.d.	ix.s.iiii.d.	vi.li. ii.s.vi.d.
v. Pence		ii.s.xi.d.	xi.s.viii.d.	vii.li. xii.s.i.d.
vi. Pence		iii.s.vi.d.	xiiii.s.	ix.li. ii.s.vi.d.

A Prognostication of Expenses.

WHo gets a Groate a day,
and in a day it spendeth;
May long time liue, though little haue,
what euer hee intendeth,
Who in a day doth get a Groat,
and of his Groat doth two Pence spend,
May quickly thriue, and somewhat get
to giue vnto his Friend:
But hee that spendes a Groat a day,
and earneth but two Pence;
Will proone a Beggar I doe feare,
what e're was his pretence.

Eclipses.

THere will be onely two Eclipses this yeare, and both of the Sunne: but neither of them shall appeare in our Horizon, or seene by vs here in England, and therefore I omit further to speake of them.

Rules of Measuration.

THe Circumference of the Earth is 21600. Italian Myles, or 7200. Leagues: A League is 3. Myles with vs.

The Diameter of the Earth is $6872\frac{8}{11}$. Italian Myles: Now halfe that, is the Semidiameter.

The Circumference of the Earth, or the Compasse of the Re-

raffell wee dwell in, is, 4628. Leagues, or 13884. Myles.

The Sunne runnes 90. Myles an hower, 21600. Myles in a day and nyght, 7884000 Myles in a yeare.

Three Barly Cornes make an Inch, 12. Inches a Foote, 3. Foote a Yard, 5. Yardes & a halfe make a Pearch. 40 Pearches a Furlong. 320. Pearches a Myle: Eight Furlonges maketh a Myle, 1760. Yardes will reach a Myle. so will 5280. Foote, or 63360. Inches: or, 19008 0. Barly cornes doe the same. and 40. Pearches in length, and 4. in breadth doe make an Acker by Statute.

Iudgement of Complexion, by the Nayles of the Hand.

THe Nayles doe shew the goodnesse or badnesse of the Heart; and therefore of the Complexion: for if they be somewhat redd, they betoken Choller well tempered; but if they be redd somewhat inclining to blacknesse, it betokeneth a Sanguine complexion: but if they be yellowish, or blacke, it signifieth Melancholy.

Necessarie Obseruations concerning the change and alteration of Weather.

Ordenarie Signes and tokens of faire Weather.

A Redde Skie in the euening, sheweth it will be faire the next day: the cleare ysing and setting of the Sunne, the falling of the Dewe in the morning. the flying of Battes in the euening, an Easterly Winde, the appearing of a bright Circle about the Moone like to a Crowne, the Caying of Dawes in the morning, the gaping of Crowes and Rauens towards the Sunne, is a manifest signe of great Heate. Cranes flying together in the Ayre making a great noyse, prognosticateth fayre Weather to follow: but flying out of order, sheweth the contrary. If the Owle sing after her manner in rainy cloudy weather, it betokeneth a sodaine change to faire breaking vp. When Starres shine very bright in Winter, it is an euident signe of frost.

Ordinary

Ordinarie Signes and Tokens of Raynie, Cloudy, and tempestious weather.

THe sweating or moystnesse of Stones, the extraordinary biting of the Fleaes, the falling of the Soote from the Chimnie, the Caying of Crowes, Belles heard farther then they were wont to bee, the flying of Gnattes about mens eyes, when Sheepe doe skippe and mount about the Fieldes as seeming very iocund and merry, it prognosticateth Raine to follow immediately: The like is declared by the Dre or Bullocke, when they licke themselues against the Haire: also by his lifting vp of his Nose towards the Skie or by his looking or snuffing on the ground, striuing to feede ouerhastily more then he was wont to doe. The extraordinary crying and crowing of Peacockes, when Cattle eate greedily, or licke their Hoones, a redde Skie in the morning, when the Sawe diggeth the ground with her frete: also, when Goates sleepe too neere one another, Winde from the West, and from the South; when the Bull hideth himselfe more covertly then he was wont to doe, or by his snelling and bellowing vp towards the Ayre; when Frogges are heard lowdest croaking and more strongly then they are wont to be, it is a plaine token of Raine and Tempest to follow after: When Water-fowles leane the Sea, & enter farre vpon the Land, it sheweth the same. The crying of the Owle in faire calme weather, denoteth a change to Rayne weather: When Dolphins arise, leape, and play in the Sea, discouering themselues aboue the Water, it is then iudged that great Winds will arise from those partes from whence the Dolphins seeme to come. When the Crow flyeth directly towards the Sea, it prelageth Raine to follow: as also when they keepe themselues alone on the Sea shoare, in heauie and melancholie manner her notes sorrowfull, and when her notes come from a hoarse voyce, with flapping of her Winges, it is a signe and token of Winde and Tempest. The same is also to be gathered, if when the Sunne is low declyning into the West. Ranens, Crowes, and Pies, flocking together, doe sing, mount and fly vp towards the Firmament, and then descend downe againe,

renewing their former Notes, these are sayd to be predictions of Cold and Windie raine. When household Poultrie, as Cockes, Capons, Hennes, Duckes, Geese, dos flap their wings, and mount up merrily chattering, or as it were reioycing, it is an euident testimonie of Raine and tempest: Also, when the Larke singeth very early in the morning; when Duckes do willingly Bath themselues, with picking, imping, and preening of their Feathers with their Billes: Also, when Swallowes flie so neere to the Water that they seeme to smite the water with their winges, it sheweth Raine to follow. When the Cornes, or hard Knobs of the Feete or Toes to trouble one that hath them, it is a signe of Raine and Wette weather: And many such like ordinarie Signes and Tokens, which for breuitie sake, I here omit.

LEt Vertue spring, and Vice decay,
And God will turne his Wrath away.
Repent thy Sinne, and doe no more:
Then Corne and Cattle thou shalt haue store.
Lay Pride aside, and Belly cheare,
And God will send a happie yeare.

Soli Sapienti Deo, sola gloria.

FINIS.
